WORK EXPERIENCE

CorpoMerch | *Full Stack Developer & Growth Lead* Jun 2026 - Present

- Own end-to-end development of the company's e-commerce platform, built from scratch and now running a product catalog across 10+ categories.
- Built and maintained a robust internal admin system that gives non-technical staff full control over a 3-axis variant catalog, 4-tiered pricing, and customer engagement without developer involvement.
- Lead digital marketing and growth strategy to drive BDT 100,000+ organic sales monthly.
- worked closely with the marketing team of multinational organisations such as Unilever and Marico.

AFK Tech Limited | *Software Developer* May 2025 - Jun 2026

- Collaborated with a 4+ person cross-functional team of developers and designers to create an in house event management product and client facing projects.
- Developed full-stack modules end-to-end, from backend API design with Node.js to React Ne frontends and deployment.

SKILLS

- **Frontend:** JavaScript, TypeScript, React.js, Next.js, Tailwind CSS
- **Backend:** Node.js, Python, Express.js, Prisma, REST API
- **Database:** MongoDB, PostgreSQL, Supabase
- **Tools:** Jira, Git, CI/CD, VPS Deployment, Docker, Linux

PROJECTS

Innoverse Bangladesh Full Web Presence With Admin Dashboard | Live Link

An event management system for the Ministry of ICT's largest science carnival event in Bangladesh.

- Built the entire frontend online presence for an event that accommodated 20,000+ members.
- Developed a registration system for startups, students, and STEM-based projects.
- Prepared a full-stack admin panel that managed 2500+ registrations, 200+ team registrations, and 60+ startup registrations

Technologies: Next.js, TypeScript, Tailwind CSS, Node.js, Express.js

Seenjoy Academy - Live Course Sales Platform | Live Link

A production-ready, full-stack course registration platform built for a content creator's live public masterclasses.

- Built a 2-app monorepo from scratch, a 7-page student storefront and a 5-page admin dashboard with a shared PostgreSQL database, serving a live course with real paying students.
- Integrated SSLCommerz payment gateway with a full order lifecycle, and modernised UI that helped to generate 100,000 BDT sales within 3 days of launch.
- Applied full SEO setup with dynamic OpenGraph metadata, canonical URLs, Google Analytics (GA4), and Meta Pixel event tracking that helped the website generate sales and rank #1 in Google search.

Technologies: Next.js, TypeScript, Prisma, PostgreSQL, Tailwind CSS, Framer Motion, SSLCommerz, Supabase
